Description

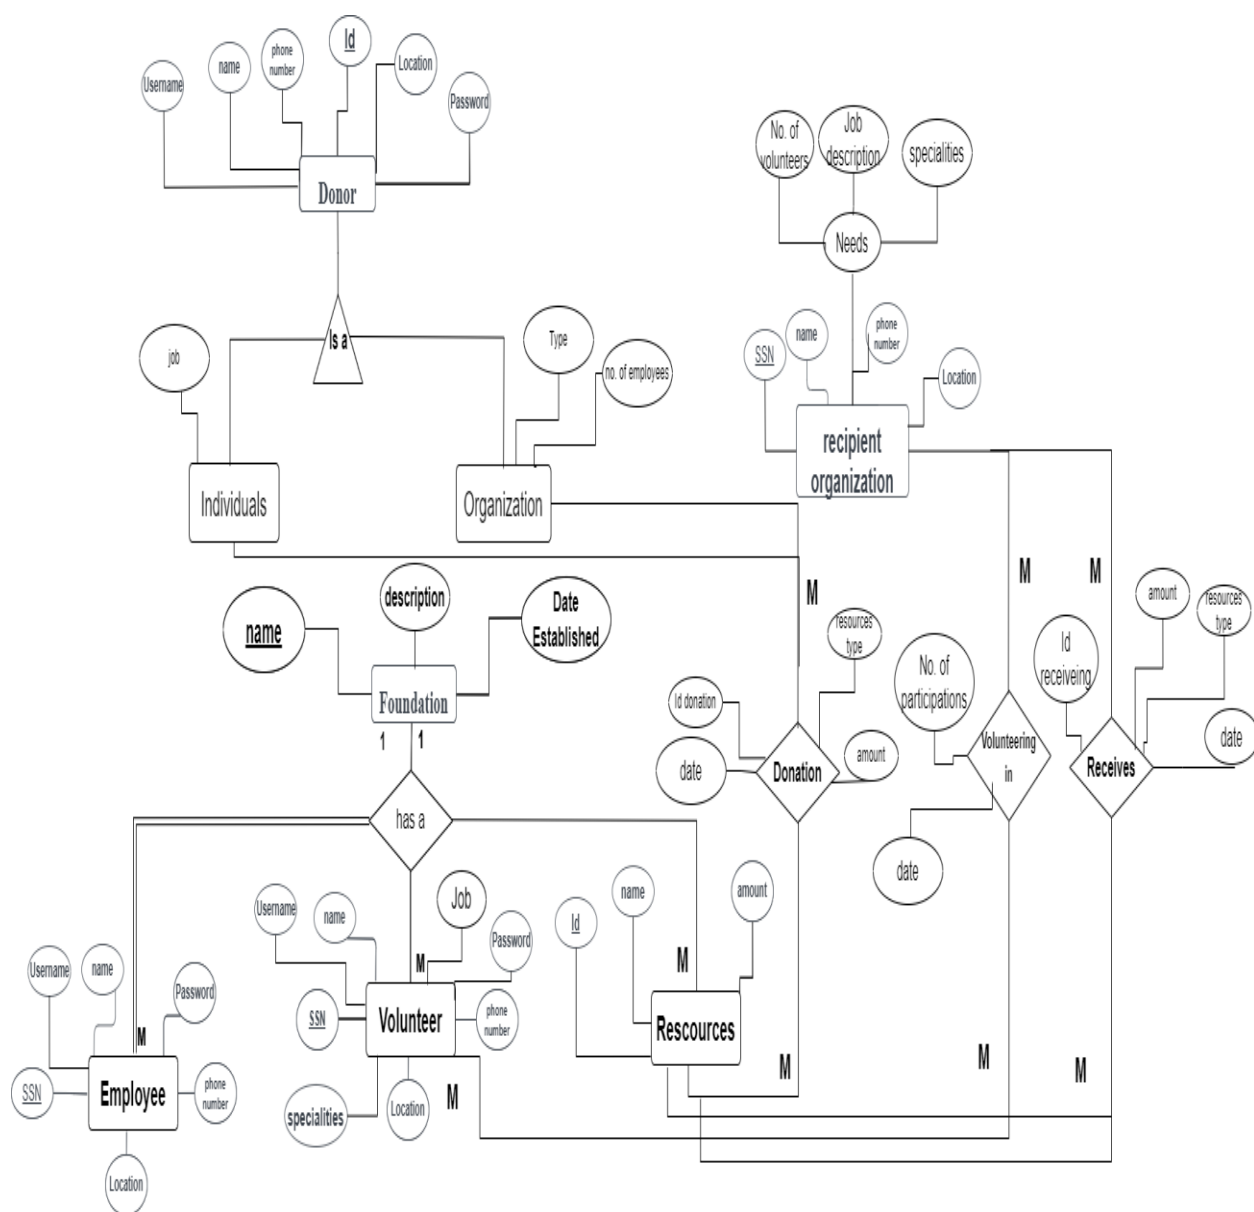

Our project is about Foundation Management System, this foundation was created to facilitate the functions that the charitable organizations are doing that depends on donations that are done by individuals and organizations also, the aim of the system is to manage the collection,

and distribution of resources to recipient organizations in need also, the system consists of three main parts admins, volunteers, and resources. Admins can manage the overall functionalities of the foundation and have access to the system's administrative features. Volunteers also play a vital role in assisting with various tasks, for instance: as resource collection and assortment with recipient organizations. Resources are the donations received from donors, which can be categorized into two types of individuals and organizations.

Business rules

- 1- Donors are identified by an SSN, and unique Id donation, name, username, password, phone number and location.
